Thermo King Compressors

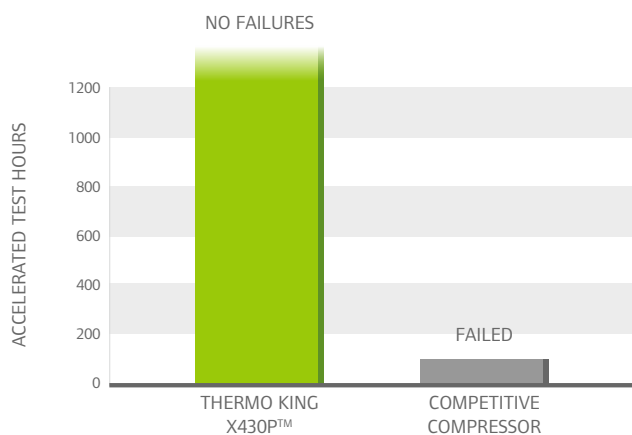

X430P™ and X426P™ reciprocating compressors – the heart of Thermo King trailer units

Thermo King Edge: our compressors offer greater reliability, longer life and market-leading warranty

Thermo King is pleased to introduce the new X430P™ and X426P™ compressors, an industry-leading compressor solution offering unrivalled reliability and durability. The compressors are engineered to exceed industry standards for fuel efficiency and longevity. The key new features and benefits include:

- New pressurised shaft seal technology that keeps shaft seal lubricated in all operating conditions.
Thermo King has proven that this new patented shaft seal technology improves the reliability of the shaft seal by 85 percent.
- An integrated internal compressor oil filter that reduces the chance of oil leaks and decreases compressor install time by 20 minutes.
- Up to 24 month parts warranty.

ACCELERATED SHAFT SEAL TESTING

Thermo King shaft seals offer greater durability for longer life than competitive shaft seal designs.

Thermo King Edge: made in our own state of the art manufacturing facilities

Genuine Thermo King compressors are developed by dedicated teams of Thermo King engineers and tested exclusively in state of the art R&D centres for highest performance and longer life to exceed customer expectations.

Thermo King Edge: Thermo King offers a range of compressor replacement options

Thermo King offers a wide range of exchange and remanufactured components providing you with Thermo King quality at an affordable price.

- New and exchange X430P™ and X426P™ compressors

Exchange
Parts

- Remanufactured X430 compressor

Remanufactured
Parts

- Overhaul compressor kits and genuine replacement parts. Thermo King sells all parts to repair Thermo King Compressors, including overhaul kits, connecting rods, crankshafts, pistons, bearings and more.
