Tail Lift Charger for Trailer

The Thermo King Tail Lift Charger is an independent unit that charges the batteries (2 X 12V in series) on the tail lift of a trailer unit, using the Reefer units' alternator.

The independent charger converts a 12V supply to 24V - needed for tail lift electric motor models.

The unit has been designed to give priority to the reefer unit, and is independent of the pulley drive systems. Lower power = Lower fuel consumption.

It allows customers to operate tail lift and lights anytime and anywhere when the truck is not loaded.

Key Features

- Power for tail lift batteries from reefer unit
- Power for internal lighting through tail lift
- Configured with 2 chargers for longer life & lower power consumption
- A safer and more reliable method of charging than retrofit alternatives
- Quick and easy installation across different models
- Enclosure box IP rated and vibration resistant

Description	Part No
24V Tail Lift Battery Charger	● 401158
120A Alternator	● 42258
Harness kit 9 meter	△ 401012
Harness kit 18 meter	△ 401013

● Standard △ Optional
