

3-IN-1 FUEL KIT

— filtration + priming + heater —

3-in-1 Fuel Kit: Filtration + Priming + Heater

Features

- Removes contaminants from fuel
- Rugged priming pump for fast system priming
- Thermostatically controlled heater element for seasonal usage in low ambients
- Harness & relay to connect to your unit for heater version
- Replaceable fuel filter water separator

The 3-in-1 fuel filtration and priming system with heater comprises:

- Fuel filter
- Water separator
- Priming pump
- Integrated heater

Specifications

- 30 micron
- Prime an engine in under 5 minutes
- Suitable for all truck and trailer applications
- Validated for applications at -40 to $+80^{\circ}\text{C}$
- Recommended for all units operating at ambients of -5°C or below
- Water separation for optimum engine power output
- Low voltage disconnect relay to protect battery

Benefits

- Protects injectors and engine from damaging contaminants
- Self priming ensures the avoidance of unnecessary service call out charges
- Eliminates the risk of fuel starvation at low temperatures
- Easy to retrofit with integrated harness
- Relay prevents battery drainage
- Reduces running costs by optimising fuel economy and increases engine life by removing water from fuel before it can cause engine damage

3-in-1 Fuel Kit: Filtration + Priming + Heater

Fuel issues are one of the leading causes of system shutdowns which can lead to delivery delays and unforeseen costs. Different qualities and grades of fuels can lead to increased water collection and microbial growth in the tank and this combined with different working environments can create the following issues:

- Contaminated fuel is one of the leading causes of system shutdown
- Running out of fuel is the second most common issue which results in a service call out
- Using incorrect fuel in colder ambients

These conditions can cause system failures leading to delivery delays, lost loads and unforeseen repair costs. Thermo King Fuel Filtration Systems minimize the risk of unit shutdown, increase uptime and reduce service callouts.

CALL YOUR DEALER TODAY!

Thermo King – by Trane Technologies (NYSE: TT), a global climate innovator – is a worldwide leader in sustainable transport temperature control solutions. Thermo King has been providing transport temperature control solutions for a variety of applications, including trailers, truck bodies, buses, air, shipboard containers and railway cars since 1938.
