

LEASE ASSIST

— insight into all your refrigerated units
with just one click —

Increased control. Superior service.

Lease Assist - part of TracKing - lets you instantly check the availability of all your TRUs, remotely activate or deactivate contracts, and consult relevant information for enhanced data-driven decision-making. Lease Assist is available in-browser, on any device. Contact your nearest dealer for more information.

 THERMO KING

Thermo King – by Trane Technologies (NYSE: TT), a global climate innovator – is a worldwide leader in sustainable transport temperature control solutions. Thermo King has been providing transport temperature control solutions for a variety of applications, including trailers, truck bodies, buses, air, shipboard containers and railway cars since 1938.

FLEET MONITORING
FOR LEASING AND RENTING COMPANIES

Increased control. Superior service.

Lease Assist is the Connected Solutions platform that helps leasing and rental companies manage their Thermo King temperature refrigeration units. Log in online to check availability, trigger (de)activation, consult alarm logs, and deliver superior service to your clients.

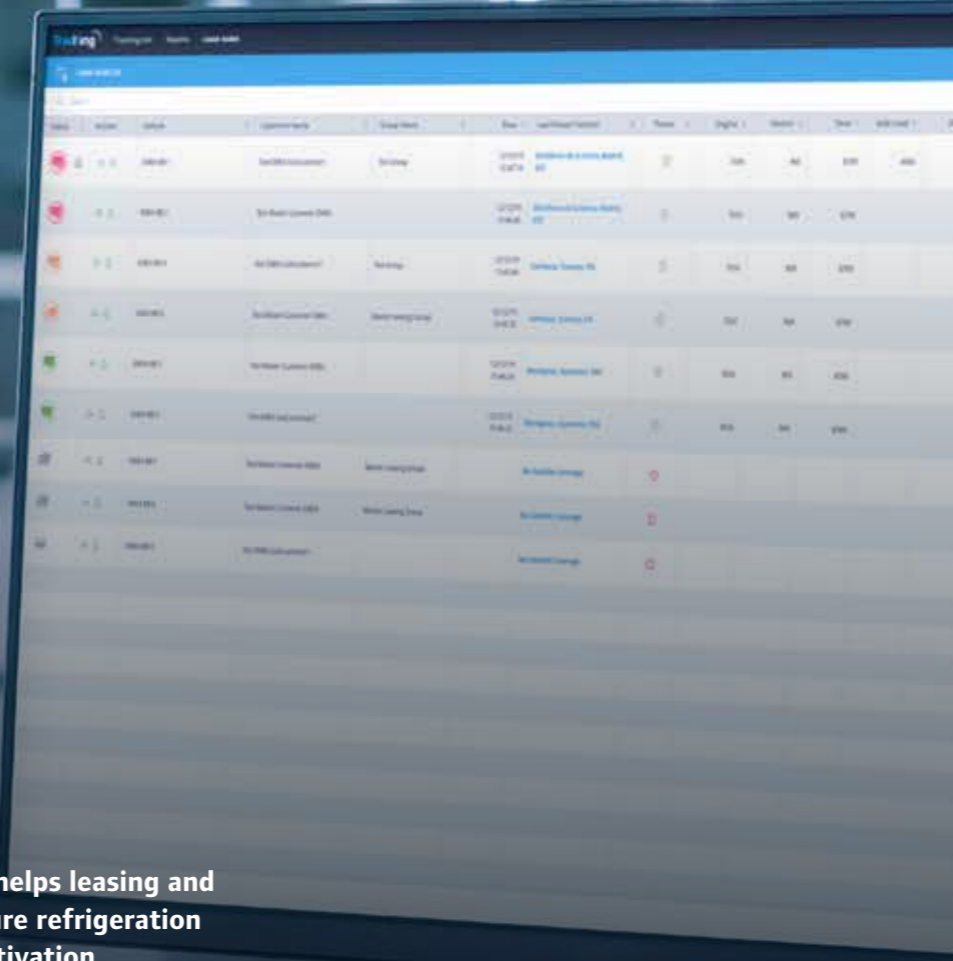

Save precious time thanks to the operational features of an integrated platform

Gain advanced insights into your units' status and performance

Bill more accurately through automated reporting of engine hours

KEY OPERATIONAL CAPABILITIES

Lease Assist helps you manage your customers by letting you **activate, pause and conclude your refrigeration units' leasing or rental agreements with a single click.**

ALL YOUR UNITS IN 1 VIEW

Whether they're on the road, in the yard or ready-to-lease/rent – Lease Assist shows you the status of your units. This screen allows you to reply faster and more accurately to client requests.

Lease Assist also offers more **advanced insights.** You can filter unit information by customer or by alarm severity to see:

- unit status
- customer name
- diesel hours
- electric hours
- total hours
- vehicle name
- alarms & notifications

STOP MANUALLY CHECKING ENGINE HOURS

The online platform shows engine hours per client and gives you the possibility to download this information as a .pdf, .xlsx or .docx file. Use the resulting action report to analyze actual usage and develop a more **accurate billing process.**

TK BlueBox required

For units to be featured on Lease Assist, they need to be equipped with a TK BlueBox. These are factory-fitted in all Thermo King SLXi units and A-Series units and available as an option (factory-fitted or aftermarket) for vehicle-powered and self-powered units.

KEEP A CLOSE EYE ON YOUR UNITS

Lease Assist shows you alarm codes for each unit. As a result, you can assess the short- and long-term health of each TRU and offer the right support to your clients, at the right time. Export this view into Excel to enable easy information-sharing.

TRICKLE-DOWN BENEFITS

The powerful telematics capabilities of Connected Solutions feed Lease Assist with the data you need to truly understand your clients' operations. Translate those insights into concrete actions by:

- checking frequent **alarm codes** and proactively suggesting next steps
- predicting **end-of-life** and taking the necessary actions to avoid downtime
- set up custom **alarm notifications** and have these delivered via TK Notify or email

Thirsty for more? Lease Assist also gives you access to the 2-way command history of all your units. The information, however, is limited and strictly meant for leasing and rental companies ¹.

GETTING STARTED WITH LEASE ASSIST

Contact your nearest Thermo King dealer to receive more information on Lease Assist and Connected Solutions in general.

¹ If you or your client would like to enjoy the complete logs of 2-way commands, your client will need their own TrackKing subscription.
